MD. SAIDUZZAMAN

Sakyo Ward, Kyoto, Japan | +81 80-6970-7458 | md.saiduzzaman.cs@gmail.com | st262556@m2.kcg.edu

Portfolio: saiduzzamanlisan1337.github.io/Md_Saiduzzaman/ | **GitHub:** github.com/SaiduzzamanLisan1337

Research Interests

Interested in research at the intersection of AI and cybersecurity, particularly in adversarial and robust AI, trustworthy and secure AI, continual and adaptive learning for cyber defense, AI-driven intrusion and anomaly detection, AI-powered malware and threat detection, automated vulnerability discovery, and privacy-preserving federated learning, as well as related areas of reliable and resilient intelligent security systems.

Education

The Kyoto College of Informatics and Graduate Studies (KCGI) — *Kyoto, Japan*
M.Sc. in Information Technology (Major: Artificial Intelligence) — *Expected Sep. 2027*
Medium of instruction: English

Bangladesh University of Professionals (BUP) — *Dhaka, Bangladesh*
M.Engg. in Information Systems Security — *CGPA [3.46/4.00]* — *2022-2023*
Medium of instruction: English

Primeasia University (PAU) — *Dhaka, Bangladesh*
B.Sc. in Computer Science and Engineering — *CGPA [3.37/4.00]* — *2018-2021*
Medium of instruction: English

Research Experience

Master's Thesis Research — The Kyoto College of Informatics and Graduate Studies (In progress)
Byzantine-Robust Human-in-the-Loop Calibration for Continual Self-Supervised Intrusion Detection

- Investigating continual and self-supervised learning approaches for adaptive network intrusion detection.
- Developing a human-in-the-loop calibration mechanism to incorporate analyst feedback into model adaptation.
- Studying robustness against Byzantine or unreliable feedback in collaborative learning environments.
- Evaluating anomaly detection and attack classification performance under evolving network conditions.

Master's Research Project — Bangladesh University of Professionals
Enhanced Data Center Security Posture Through Network Segmentation and Unified Threat Monitoring

- Designed a zero-trust multi-zone network security model deploying Cisco Firepower Threat Defense (FTD) NGFWs and Cisco FMC for centralized policy orchestration across DMZ, MZ, and internal LAN segments.
- Integrated Wazuh SIEM for real-time log normalization, event correlation, and sub-second detection of multi-vector threats (port scanning, SSH brute-force, lateral movement).
- Validated VLAN micro-segmentation, OSPF/BGP routing stability, and failover behavior within an emulated EVE-NG virtualized network topology.

Professional Experience

Jr. Cyber Security Engineer, Techforing Ltd. *Dhaka, Bangladesh* *Apr. 2024 – Sep. 2025*

- Conducted comprehensive vulnerability assessments using Nessus and OpenVAS, and developed remediation plans for critical findings.
- Performed digital forensic investigations using Autopsy, Cellebrite, and FTK to recover and analyze evidence from disk, mobile, and network sources.
- Analyzed system, network, and application logs to identify and characterize security incidents.
- Investigated cases of fraud, financial fraud, identity theft, and data breaches; prepared detailed incident, vulnerability-assessment, and penetration-testing reports.

IT Executive, Security, Grameen Bangla Holdings Limited *Dhaka, Bangladesh* *Nov. 2021 – Mar. 2024*

- Maintained device hardening and patch cadence.
- Conducted vulnerability assessments and employee security-awareness training.
- Monitored the organization's systems for breaches and unusual activity using Wazuh SIEM.

Technical Skills

Programming & Machine Learning: Python, C, SQL (MySQL), PyTorch, NumPy, scikit-learn

Software Engineering & Deployment: FastAPI, REST APIs, SQLite, Pytest

Security & Forensics Tools: Wazuh, Burp Suite, Nessus, Wireshark, Maltego, Nmap, SQLmap, OWASP ZAP, DAST, Epios, Autopsy, Cellebrite, FTK

Security Frameworks & Standards: MITRE ATT&CK, Cyber Kill Chain, Pyramid of Pain, Diamond Model, NIST Cybersecurity Framework (CSF)

Systems Administration: Windows Server administration, Linux Server administration

Certifications & Professional Development

- **Certified Ethical Hacker (CEH v11)** — Arena Web Security (120-day program)
- **Linux Server Administration with Windows Server 2016 Management** — BASIS SEIP (90-day program)
- **Cisco Certified Network Associate (CCNA v1.0)** — CSL Training Center (72 hours)
- **Red Hat Certified System Administrator (RHCSA v9)** — CSL Training Center (56 hours)
- **Professional English Communication Skills, Grade A** — Workplace Skills Development Academy, New Zealand (7-day program)

Languages

Bangla — Native | English — Professional working proficiency
